## IX. CENTRAL TOBACCO RESEARCH INSTITUTE RAJAHMUNDY—CONSTRUCTION OF BARNs DEPARTMENTALLY—REGARDING.

In Government of India (Ministry of Food and Agriculture) No. F.6-126/58-Com.II, dated 2nd September, 1958, the Government of India approved the construction departmentally of four curing barns (two of size 20' x 16' x 16' and the other two of size 16' x 16' x 16') at the above Institute at an estimated cost of Rs. 23,634/-. The departmental construction of the four barns was accordingly taken up on 19th October, 1958 (*vide* the barn muster roll) and completed on 19th February, 1959 as seen from the Register of Buildings. For this purpose, the following materials were procured.

1. Cement.
2. Bricks.
3. Sand.
4. M. S. Rods.
5. Jelly.
6. Teak-wood
7. Trusses.
8. Asbestos Sheet etc.

These materials were first brought under 'stock' in the stock register (expendable) of the farm and subsequently issued in full as the construction work had progressed on regular indents of the engineer. Apart from the indent, there is no record regarding complete utilisation of the materials given on lump basis for the work and whether any balance of materials were left unutilised. A register indicated as 'Measurement Register' has been opened where details by items of work done has been recorded work-wise for all the four barns (barn-wise) e.g.

(i) "E. W. excavation" is recorded in page 1, for all the 4 barns separate for each barn.

(ii) Brickwork in foundation 1:6 on page 4-5.

The works have been executed partly by muster roll labour and partly by piece-workers but the specific works done by the muster roll labour are not recorded in the measurement register.

In this connection, the following remarks are made:—

(1) As referred to above, it has not been possible for audit to verify whether all the materials issued to the works were fully utilised and there was no balance of materials when the work was completed on 19th February, 1959. Separate statement comparing the total quantity of each of the materials issued with the data requirement of materials for items of work actually executed, may please be worked out and the balance of materials, if any, arranged to be disposed of. Action taken may be intimated to audit.

(2) The measurements for the work done both by casual labour and piece-workers should have been recorded chronologically for each individual work separately as work had progressed giving cross reference to the muster-roll payment and payments to piece-workers. It is suggested that in such cases of departmental execution of works measurements may be recorded in prescribed measurement and procedure for payment etc., as in vogue in the Central Public Works Department may be followed in future.
